# How Moxi All features make patients' lives easier

Feature	What it does
<b>Hands-free connectivity</b>	A simple wireless connection to Bluetooth®. Frees patients to do other things while talking on the phone. Answer or hang-up with the push of a button. No accessory required.
<b>IP68</b>	Gives patients comfort knowing their hearing aids are protected and durable in wet and dusty environments, even with the rechargeable option. Reduces repairs.
<b>Made for all cell phones</b>	Works with any phone using the Bluetooth® Classic protocol: Apple®, Android™, flip phone – you name it.
<b>Patient Ratings compatibility</b>	Patients can share their impressions about hearing aid performance in the moment using the Remote Plus app. No need to remember details for their next appointment.
<b>Premium binaural features</b>	Helps patients listen and engage with ease in the most challenging listening environments.
<b>Push button control</b>	Permits patients to answer or hang up the phone with a push button on Moxi All. Can make acoustic changes if desired, even without the Remote Plus app.
<b>Rechargeable</b>	Powers the hearing instrument all day with an overnight charge. No need for weekly battery changes. Can use rechargeable or disposable batteries. Available as a retrofit kit if their needs or desires change.
<b>Remote Plus app compatibility</b>	Transforms a phone or tablet into a remote control. Adjusts volume, program and TV Connector audio balance. Provides tutorial videos. A tool for Patient Ratings.
<b>Spatial awareness</b>	Helps patients not just hear sounds but also localize those sounds.
<b>TV Connector compatibility</b>	Moxi All wearers and others will enjoy TV listening together with an easy plug-and-play solution and premium binaural audio streaming. A portable solution when used with an external battery pack (not included).
<b>Wind noise management</b>	Suppresses wind noise to make outdoor listening easier.
